

Welcome to the PIA for FY 2010!

Congress passed the E-Government Act of 2002 to encourage the use of Web-based Internet applications or other information technology by Government agencies, with the intention of enhancing access to government information and services and increasing the effectiveness, efficiency, and quality of government operations.

To combat public concerns regarding the disclosure of private information, the E-Government Act mandated various measures, including the requirement that Federal agencies conduct a Privacy Impact Assessment (PIA) for projects with information technology systems that collect, maintain, and/or disseminate "personally identifiable information" of the public. Personally identifiable information, or "personal information," is information that may be used to identify a specific person.

The Privacy Act and VA policy require that personally identifiable information only be used for the purpose(s) for which it was collected, unless consent (opt-in) is granted. Individuals must be provided an opportunity to provide consent for any secondary use of information, such as use of collected information for marketing.

Directions:

VA 6508 is the directive which outlines the PIA requirement for every System/Application/Program. More information can be found by reading VA 6508.

If you find that you can't click on checkboxes, make sure that you are: 1) Not in "design mode" and 2) you have enabled macros.

PIA Website: http://vaww.privacy.va.gov/Privacy_Impact_Assessments.asp

Roles and Responsibilities:

Roles and responsibilities for the specific process are clearly defined for all levels of staff in the Privacy Impact Assessment Handbook 6202.2 referenced in the procedure section of this document.

- a. The Privacy Officer is responsible for the overall coordination and review of the PIA to ensure compliance with VA Handbook 6202.2.
- b. Records Officer is responsible for supplying records retention and deletion schedules.
- c. Information Technology (IT) staff responsible for the privacy of the system data will perform a PIA in accordance with VA Handbook 6202.2 and to immediately report all anomalies to the Privacy Service and appropriate management chain.
- d. Information Security Officer (ISO) is responsible for assisting the Privacy Officer and providing information regarding security controls.
- e. The CIO is responsible for ensuring that the systems under his or her jurisdiction undergo a PIA. This responsibility includes identifying the IT systems; coordinating with the Privacy Officer, Information Security Officer, and others who have concerns about privacy and security issues; and

systems, coordinating with the Privacy Officer, Information Security Officer, and others who have concerns about privacy and security issues, and reviewing and approving the PIA before submission to the Privacy Service.

Definition of PII (Personally Identifiable Information)

Information in identifiable form that is collected and stored in the system that either directly identifies an individual by name, address, social security number, telephone number, e-mail address, biometric identifiers, photograph, or other unique numbers, codes or characteristics or combined, indirectly identify an individual such as a combination of gender, race, birth date, geographical indicators, license number is also considered PII.

Macros Must Be Enabled on This Form

To enable macros, go to: 1) Tools > Macros > Security - Set to Medium; 2) Click OK; 3) Close the file and when reopening click on Enable Macros at the prompt.

(FY 2010) PIA: System Identification

Program or System Name:	Region 2 VHA VISN 12 Milwaukee VAMC VISTA
OMB Unique System / Application / Program Identifier (AKA: UPID #):	029-00-01-11-01-1180-00

The VISTA system is the software platform and hardware infrastructure (associated with clinical operations) on which the Zablocki VAMC operates its software applications and support for E-Government initiatives. The local system includes the computer equipment associated with clinical/administrative operations and the employees necessary to operate the system. VistA is a client-server system. It links the facility computer network to over 100 applications and databases. Zablocki VAMC healthcare providers and staff can access the VistA

(FY 2010) PIA: Program Level Questions

Does this PIA form contain any sensitive information that could cause harm to the Department of Veterans Affairs or any party if disclosed to the public?

No

If Yes, Please Specify:

Explain how collected data are limited to required elements:

The data collected is limited to the form 1010EZ and the VA registration package for determination of eligibility for VA medical benefits.

Answer:

How is data checked for completeness?

Answer:

The 1010EZ is reviewed for completeness and the form is signed by the veteran as being complete and accurate

What steps or procedures are taken to ensure the data remains current and not out of date?

Answer:

The veterans' information is updated yearly on the form 101EZR, information is verified at each outpatient appointment and admissions to the hospital

How is new data verified for relevance, authenticity and accuracy?

Answer:

new data is changed by the veteran either in person or in writing. Supporting court documents for changes in marital status and legal names changes are required before the information can be changed.

Additional Information: (Provide any necessary clarifying information or additional explanation for this section.)

None

information is
retained accords to
RCS 10-1

Answer:

Explain why the information is needed for the indicated retention period?

It's maintained
according to RCS 10-1

Answer:

What are the procedures for eliminating data at the end of the retention period?

Answer:

Data is detroyed
according to VA
Reocrds Control
Schedule 10-1

Where are these procedures documented?

Answer:

VA Handbook 6300;
Record Control
Schedule 10-1

How are data retention procedures enforced?

Answer:

Per VA Reocrds
Control Schedule 10-1

Has the retention schedule been approved by the National Archives and Records Administration (NARA)

Yes

If Yes, How will parental or guardian approval be obtained?

Answer:

(FY 2010) PIA: Security

Is the system/application/program following IT security Requirements and procedures required by federal law and policy to ensure that information is appropriately secured. Yes

Has the system/application/program conducted a risk assessment, identified appropriate security controls to protect against that risk, and implemented those controls.. Yes

Is security monitoring conducted on at least a quarterly basis to ensure that controls continue to work properly, safeguarding the information? Yes

Is security testing conducted on at least a quarterly basis to ensure that controls continue to work properly, safeguarding the information? Yes

Are performance evaluations conducted on at least a quarterly basis to ensure that controls continue to work properly, safeguarding the information? Yes

If 'No' to any of the 3 questions above, please describe why:

Answer:

Is adequate physical security in place to protect against unauthorized access? Yes

If 'No' please describe why:

Answer:

Explain how the project meets IT security requirements and procedures required by federal law.

Answer: Local IT security measures include use of user identification and authentications, physical security and configuration management. Local security programs include anti-virus protection, authentication, vulnerability scanning & penetrations testing, intrusion detection, risk assessment and incident response capability

PIA: PIA Assessment

Identify what choices were made regarding the project/system or collection of information as a result of performing the PIA. Additional controls to mitigate misuse.

Availability Assessment: If the data being collected is not available to process for any reason what will the potential impact be upon the system or organization?
(Choose One)

- The potential impact is **high** if the loss of availability could be expected to have a severe or catastrophic adverse effect on operations, assets or individuals.
- The potential impact is **moderate** if the loss of availability could be expected to have a serious adverse effect on operations, assets or individuals.
- The potential impact is **low** if the loss of availability could be expected to have a limited adverse effect on operations, assets or individuals.

Integrity Assessment: If the data being collected has been corrupted for any reason what will the potential impact be upon the system or organization?
(Choose One)

- The potential impact is **high** if the loss of availability could be expected to have a severe or catastrophic adverse effect on operations, assets or individuals.
- The potential impact is **moderate** if the loss of availability could be expected to have a serious adverse effect on operations, assets or individuals.
- The potential impact is **low** if the loss of availability could be expected to have a limited adverse effect on operations, assets or individuals.

Confidentiality Assessment: If the data being collected has been shared with unauthorized individuals what will the potential impact be upon the system or organization?
(Choose One)

- The potential impact is **high** if the loss of availability could be expected to have a severe or catastrophic adverse effect on operations, assets or individuals.
- The potential impact is **moderate** if the loss of availability could be expected to have a serious adverse effect on operations, assets or individuals.
- The potential impact is **low** if the loss of availability could be expected to have a limited adverse effect on operations, assets or individuals.

The controls are being considered for the project based on the selections from the previous assessments?

The minimum security requirements for our high impact system cover seventeen security-related areas with regard to protecting the confidentiality, integrity, and availability of VA information systems and the information processed, stored, and transmitted by those systems. The security-related areas include: access control; awareness and training; audit and accountability; certification, accreditation, and security assessments; configuration management; contingency planning; identification and authentication; incident response; maintenance; media protection; physical and environmental protection; planning; personnel security; risk assessment; systems and services acquisition; system and communications protection; and system and information integrity. Our facility employs all security controls in the respective high impact security control baseline unless specific exceptions have been allowed based on the tailoring guidance provided in NIST Special Publication 800-53 and specific VA directives.
