

Welcome to the PIA for FY 2011!

Congress passed the E-Government Act of 2002 to encourage the use of Web-based Internet applications or other information technology by Government agencies, with the intention of enhancing access to government information and services and increasing the effectiveness, efficiency, and quality of government operations.

To combat public concerns regarding the disclosure of private information, the E-Government Act mandated various measures, including the requirement that Federal agencies conduct a Privacy Impact Assessment (PIA) for projects with information technology systems that collect, maintain, and/or disseminate "personally identifiable information" of the public. Personally identifiable information, or "personal information," is information that may be used to identify a specific person.

The Privacy Act and VA policy require that personally identifiable information only be used for the purpose(s) for which it was collected, unless consent (opt in) is granted. Individuals must be provided an opportunity to provide consent for any secondary use of information, such as use of collected information for marketing.

Directions:

VA 6508 is the directive which outlines the PIA requirement for every System/Application/Program.

If you find that you can't click on checkboxes, make sure that you are: 1) Not in "design mode" and 2) you have enabled macros.

Roles and Responsibilities:

Roles and responsibilities for the specific process are clearly defined for all levels of staff in the VA Directive 6508 referenced in the procedure section of this document.

- a. The Privacy Officer is responsible for the overall coordination and review of the PIA to ensure compliance with VA Directive 6508.
- b. Records Officer is responsible for supplying records retention and deletion schedules.
- c. Information Technology (IT) staff responsible for the privacy of the system data will perform a PIA in accordance with VA Directive 6508 and to immediately report all anomalies to the Privacy Service and appropriate management chain.
- d. Information Security Officer (ISO) is responsible for assisting the Privacy Officer and providing information regarding security controls.
- e. The CIO is responsible for ensuring that the systems under his or her jurisdiction undergo a PIA. This responsibility includes identifying the IT systems; coordinating with the Privacy Officer, Information Security Officer, and others who have concerns about privacy and security issues; and reviewing and approving the PIA before submission to the Privacy Service.

Definition of PII (Personally Identifiable Information)

(FY 2011) PIA: Program Level Questions

Does this PIA form contain any sensitive information that could cause harm to the Department of Veterans Affairs or any party if disclosed to the public?

No

If Yes, Please Specify:

Explain how collected data are limited to required elements:

Answer: Information is collected primarily on defined forms and entered to specific fields of database records. The required veteran's data is stored within the databases, which support the individual claim or claims the veteran has been granted. The LAN accesses these databases to retrieve the data.

How is data checked for completeness?

Answer: Data is checked for completeness by system audits, manual verifications and annual questionnaires through automated veteran letters. These letters ask specific questions for verification based on the existing entitlement or benefit the veteran is receiving. Also, data are updated with each veteran correspondence.

What steps or procedures are taken to ensure the data remains current and not out of date?

Answer: Data are updated as a result of returned mail, or returned direct deposits, or through contact with the veteran, beneficiary, or power of attorney. Additionally, verifications and system audits are performed.

How is new data verified for relevance, authenticity and accuracy?

Answer: All data are matched against supporting claims documentation submitted by the veteran, widow, or dependent. Certain data such as SSN is verified with the Social Security Administration. Prior to any award or entitlement authorization(s) by the VBA, the veteran record is manually reviewed and data validated to ensure correct entitlement has been approved.

Additional Information: (Provide any necessary clarifying information or additional explanation for this section.)

Answer:

(FY 2011) PIA: Retention & Disposal

What is the data retention period?

Answer: All active and terminated veterans records are retained indefinitely; therefore, there are no procedures for eliminating data.

Explain why the information is needed for the indicated retention period?

Answer: Data on active records are changeable and maintained for historical/archival purposes

What are the procedures for eliminating data at the end of the retention period?

Answer: In general, support systems retain information until that work in progress is completed and data is committed to master systems and records. The electronic master systems retain data on a permanent basis (beyond the actual death of the veteran). If incidental data is maintained in a user's personal folder on the network, that data is deleted when the employment is terminated.

Where are these procedures documented?

Answer:VA Handbook 6300.5 and Records Control Schedule (RCS) VBA-1, Part 1, Section 8 available online at <http://www.warms.vba.va.gov/admin23/part1/sec08.doc> and the Systems of Record 58VA21/22 and 38VA23.

How are data retention procedures enforced?

Answer:Management oversight and review enforces data retention policies.

Has the retention schedule been approved by the National Archives and Records Administration (NARA)

Yes

Additional Information: (Provide any necessary clarifying information or additional explanation for this section.)
